

Power Nozzle

Power Nozzle

Secomak
a i r a t w o r k

The **Power Nozzle** is designed to compliment the existing range of Secomak air knives. The Power Nozzle is powered by low pressure, high velocity air from Secomak's range of fans and blowers, and is ideal for stripping liquids and particulate matter from a variety of surfaces.

The uniquely designed cast aluminium air cannon produces a tight stream of air which can provide effective stripping from surfaces up to 750mm from the exit.

The Power Nozzle is particularly suited for use with complex shaped components and can be easily added to existing processes for use with conveyors using adjustable clamps.

POWER NOZZLE APPLICATIONS

Secomak Power Nozzles are suitable for the following applications:

DRYING

Conveyors
Drums and Containers
Complex shaped components

COOLING

DUST REMOVAL
