For medium & budget operations up to 60,000 containers per hour

POWERDRY is a range of drying systems designed to fit over a clients own conveyor and guide system.

Available in a variety of standard configurations to suit the major drying problems in the food and beverage industries at the competitive prices demanded by the worlds major OEMs and machine integrators.

Manufactured from high grade stainless steel, the top enclosure, with space saving gull wing doors, houses a range of drying fixtures in set configurations for all major drying tasks.

The dispersed water is contained and directed to ground level via an integral drip tray and drain which also serves to isolate and protect the high efficiency blower.

There are a choice of power packs from the **Secomak** range of high velocity blowers fitted with high efficiency motors and drives.

Incremental scales for all diameter and height changes come as standard, as well as special acoustic packs to reduce noise to legislative levels.

POWERDRY offers high performance, ease-of-use and reliability at competitive prices with **Secomak** backup and technical support.

*Model illustrated is 15kW PowerDry with optional isolator

POWERDRY SPECIFIC FEATURES

HIGH PERFORMANCE DRYING

A RANGE OF STANDARD CONFIGURATIONS

INCREMENTAL SCALES FOR EASY ADJUSTMENT

CHOICE OF POWER PACKS

STAINLESS CONSTRUCTION

LOWE NOISE EMISSIONS

SMALL FOOT PRINT

HIGH RELIABILITY

BACKED BY SECOMAK SUPPORT
