For large operations or complex containers up to 120,000 per hour

POWERSTRIP is a modular drying system designed to fit over a clients own conveyor.

Specialist drying modules can be combined to customise the system to suit any drying application in the food and beverage industry.

Manufactured from high grade stainless steel the top enclosure, with space saving gull wing doors, contains and directs the dispersed water to ground level via an integral drip tray and drain which also serves to isolate and protect the high efficiency blower.

There are a choice of power packs from the **Secomak** range of high velocity blowers fitted with high efficiency motors and drives.

Optional vertical tool posts, winding devices, setting systems and digital read outs provide the operator with real power to reduce time and increase reliability during size changes.

The special acoustic packs come as standard to reduce noise to legislative levels.

POWERSTRIP offers ultimate performance, ease-of-use and reliability combined with **Secomak** backup and technical support.

*Model illustrated is the 8Kw PowerStrip with neck drying module, label panel drying module and Eco Pack options.

POWERSTRIP SPECIFIC FEATURES

HIGH PERFORMANCE DRYING

STAINLESS CONSTRUCTION

MODULAR SYSTEM

LOW NOISE EMISSIONS

CHOICE OF DRYING TECHNOLOGIES

SMALL FOOT PRINT

RANGE OF SETTING DEVICES

HIGH RELIABILITY

CHOICE OF POWER PACKS

BACKED BY SECOMAK SUPPORT
